Some deny him any right of authorship-others grant the fullest credit, and will not allow that a single point has been gained which was not his programme. Here, however, I have a bit of interesting testimony. The subject was under discussion at a dinner where Gen. Banks was present; and he, who, by the way, stands by Gen. The Railroad Accident in Illinois.

THE ACCIDENT. About half-past 10 o'clock, at a point distant nearly five miles from the city, while the foremost train was moving at almost lightening speed down a sloping grade, the axle of the forward truck of the first passenger coach suddenly broke. The unusually high rate of speed, added to the great weight in the coaches, created a powerful momentum, which hurled five of the passenger cars from the track, and tive, with the baggage cars, was detached from the rest of the train, and moved Skirmishing at Humansville, Mo. other cars were tumbled together promiscuously, here one car resting on another, and there a solitary coach crushed into a thou-sand splinters. The scene that ensued was terribly heartrending. The groans of the dying, the summoning call of a soldier to his missing comrade, the sobbing of a wife or a sister over the less of a loved companion—all contrasted strangely with the joyous and merry crowd that might have few minutes before. It was apparent that a terrible loss of life had been produced. No there. time was lost, and the surgeons, assisted by the officers, instantly set about extricating the killed and alleviating the sufferings of the wounded. The uninjured locomotive, with the freight cars, was first dispatched to the city to give the alarm, and return to the scene of the accident with a gang of men to assist in clearing the wreck. At the same time the soldiers who were unhurt were set to work, and in a short time the ruins were partly cleared away, and the bodies of ten dead soldiers removed from the resting places of rebel vessels there where death had overtaken them. In a A French man-of-w short time the engine of the disabled train, that had been dispatched to the city, returned with a force of men, leaving behind, owever, the corps of surgeons that had been rallied in this city to visit the spot. By superhuman efforts the wreck was cleared from the track in a short time, and, this having been accomplished, the first detachment of the regiment, consisting of companies G, C and I, started for Chicago, arriving here shortly after three o'clock yesterday morning. It was nearly seven o'clock, however, before the remaining companies of the regiment reached the city, bringing with them the killed and wounded. The latter are to be taken to the military hospital at Camp Douglas, where, it is needless to say, they will receive the best of medical treatment.

Some of the poor fellows who were killed were frightfully mangled by the crash of timbers and wood-work. The three privates of company G named in the above list of killed met their death from two large iron car-wheels which were hurled through whole length of the car. They were killed almost instantly. Walter Snell, a promis-ing member of the company, from Geneva, had both of his legs cut off just above the ankle. Part of the way from Janesville he was accompanied by his young wife and mother, who bade him good-bye and left the tain at Clinton Junction. The escape of many was miraculous. Lieut. Henry Goodsell, of company G, was sitting by the side of Quartermaster Sergeant Edwards at the time the axle broke, and, on hearing the noise, attempted to follow the course of the latter by jumping through the window. Edwards reached the ground, but was buried the next moment in the ruins, and received injuries which will probably terminate fatally. The other was prevented from passing through the window by his sabre-scabbard, and to this alone he owes his won-

Almost every car that was thrown from the track was broken into fragments, so great was the concussion arising from the sudden stoppage of the train. The rails were torn up, and the whole scene was one of indescribable confusion. The train was moving at an extraordinary rate of speed, and to this may be ascribed one reason for the extent of the damage caused by the accident. Hospital Steward Sharp, with six others,

were found in the ditch which ran along-side the track, and which was filled with water. No bruises were found on the person of the former, and it is consequently supposed that he was stunned by the vio lence of the fall, and was literally drowned. He was a most exemplary young man, highly esteemed by all who associated with him and respected for many conspicuous and noble qualities of character

The Escape of the Nashville.

It is reported that the Nashville was loaded with a valuable cargo of cotton and naval stores. Her lights were concealed, and she was fairly abreast the Cambridge when discovered.

An officer of the Gemsbok makes the following statement in relation to the escape of the Nashville:

When the Nashville ran in on the morning of the 28th of February last, there was only the State of Georgia on this blockade to protect three entrances-which it is impossible for one steamer to do. The sole desire of the Government is to maintain the integrity of the Constitution and laws, and reclaim revolted States to

their allegiance. At a recent meeting of the loyal citizens of Jacksonville, on the 20th, it was declared that no State has a constitutional right to separate from the United States, and the act of secession adopted by Florida is void, and is in conflict with the Constitution; never having been submitted to the people for ratification, they protest against all acts of the Convention depriving them of their rights as citizens of the United States.

They also disavowed the despotism which denied them the freedom of speech and of the press, and forced contributions of money, labor, and enlistments. They recommended that a convention be called forthwith to organize a State government and that the United States Government be requested to keep a sufficient military force to keep order and protect persons and property.

WASHINGTON, March 29 .- Herald's Dispatch -The following, dated Mannassas, March 29th, is received: The telegraph lines are completed to

Warrenton Junction. Last night, five cannon, buried by the rebels one mile and a half beyond the Junction, were found. It appears that the car containing them broke down, and the rebels buried them near the track. Three of them

are made of iron and two of brass. A freight train returning from Manassas to Alexandria, last night, found several rails across the track, near Fairfax Station, which were evidently placed there by Secessionists. A number of Secessionists live in the vicinity, and make ne secret of their

A bottle of strychnine was found among the forage abandoned in the vicinity of Warrenton Junction. The horse of Lieut. King, of the Fourth Artillery, was poisoned. A secret meeting of the Secessionists was

held at Fairfax C. H., last Wednesday.

Several soldiers have been killed in vicinity by rebel sympathisers. Sr. Louis, March 30 .- The army correspondent of the Republican, writing under date of Cairo, 28th, says the firing on Friday at Isand No. 10 was quite heavy, the rebels opening from a new battery mounted, it is supposed, with 128 pounders. The enemy could be seen cutting away the

trees and rapidly pushing forward other means of defense. They seem to have no ides of evacuating at present, and are daily getting more cannon in position. BALTIMORE, March 30 .- The rebels burnt he railroad bridge between Newbern and Beaufort, but it was in progress of repair, and the road would soon be in operation between the places, so far as our informanis knew, all of whom came from Newbern, and had not been to Beaufort. There was no destruction of property at the latter place, and a large majority of the citizens remained quietly in their homes. On the arrival of the Federal forces perfect order reigned at Newbern, and a number of citizens had returned to the place. Gen. Foster was Mil-

itary Governor of the city.

The rebels were believed to be in strong force towards Kingston, 35 miles on the road to Goldsboro, and their scouts fre-quently appeared in the vicinty of Newbern. The expedition to Washington was successful. It consisted of about 1,000 men, with an escort of gunboats. Two companies of the 22d Massachusetts landed and took the place. The stars and stripes were nailed te a tree before the Courthouse, and left

FORTRESS MONROE, March 29 .- On Friday evening the rebels threw a ball from one of the rifled guns at Sewall's Point, which came within about 300 yards of the shipping in the upper roadstead. Lincoln gun has been mounted and this morning was tried in order to test its cars riage. Only ten shots were fired. The second was a splendid ricochet shot. that he is in the finest possible spirits; also, that the rebels, under Jackson, were yesterday still in flight beyond Strasburg. Sr. Louis, Mo, March 31 .- Dispatches received at headquarters say, that on the night of the 26th, between 500 and 800 rebels attacked four companies of State militia at Humansville, Polk county, Mo., and after a sharp fight, they were defeated with a loss of 15 killed and a large number wounded. The Federals had several wounded but none killed. Nothing important from Tennessee

river. It is not expected that active opera-

tions will commence until the arrival of Buell's army, unless our forces are stiacked by Beauregard. Information has been received at headquarters that a detachment of the Ist Iowa Cavalry, under Captain Thompson, overtook a guerilla band under Colonel Parker, on the night of the 28th, about ten miles west of Warrensburg. Ffteen rebels were killed and twenty five taken prisoners. Among the latter is Colonel Parker and Captain Walters. Our loss was two killed

Mr. Latham introduced a bill to create bureau of transportation. Referred. On motion of Mr. Chandler, the bill for the appointment of lighthouse inspectors was taken up. The bill propeses to transfer the lighthouses to the revenue service, putting them under the control of the Secetary of the Treasury. After discussion,

the bill was postponed.

Mr. Wade introduced a bill to provide a Territorial Government for Arizona. Mr. Fessenden presented a joint resolu-tion from the Legislature of Maine, in favor of tendering peuniary aid to the States for the emancipation of their slaves; also, cordially approving the President's message, and declaring that she will cheerfully furnish her quota of the amount; also, asking the Senate to vote for the abolition of slavery in the District of Columbia.

The bill for the abolition of slavery in the District of Columbia was then taken up, ogtponed until to morrow.

The Senate then went into Executive Session, and subsequently adjourned.

House—The leather clause of the bill was amended as follows: On patent or enameled leather, five mills per square foot; on patent or enameled skirting leather, one and a half cents per square foot; on patent or enameled skirting leather, one and a half cents per square foot; on all sole or rough, or harness leather, made from hides imported from the east of the Cape of Good Hope, and all damaged leather, half a cent per pound; on all other sole or rough leather, the form the ware embrace the general per pound; on all other sole or rough leather, half a cent per pound; on all other sole or rough leather, half eather, except calf skins, made from leather Indiana, to be Governor of Utah, and per dozen; on doe skins, tanned or dressed, 52 | stone to be Colone, and Major ward Marsec of the control of th

She had landed at the piace named, stayed a few minutes, had transacted her bustness and the order to cast her lines loose was given, when her commander, Captain DeWitt, was informed that the boat was in a sinking condition. He was incredulous, but soon found the report to be true. Being down, and in a few seconds the water reached the noor of the ladies' cabin. No lives were lost, but so quickly did the beat sink that a hole had to be cut in the floor of the ladies' cabin in order to extricate the deck hands.

A volume of letters upor abject from officers and soldiers might be publicated in the control of bundeds in the control of the cont

subject from officers and soldiers might be published. The following extract is a sample of hundreds in the possession of Dr. Bull:
"Your Sarsaparilla has indeed proved itself invalvable as a preventive of disease. Since I commenced the use of it, two months since, I have not had an hour's illness. Personally I was, as you are aware, more than half the time on the sick list. I am satisfied that its general use in the army would reduce the sick list more than one half?"

and Periphery Clamp Feed-Wheel.

THE SE SEWING MACHINES COMBINE THE most recent improvements, are nearly noiseless when in operation, run with the greatest ease and rapidity, and are better adapted for general purposes and iamily use than any other. They are not liable to get out of order, are exceedingly simple, and are made expressly fer real practical utility; they do every variety of sewing, from the finest woven its ue to the heaviest woolen goods, both tailoring and fine leather work. Any person may learn to operate them in a very short time. me. The great difficulty with all other old-style Machines The great difficulty with all other old-style Machines is too much complication, requiring so much constant adjustment, and such an amount of mechanical skill and ingenuity to use them to advantage, as to render them of little comparative value.

But the Sewing Machines manufactured by Greenana & Tree are not liable to these objections, as any person, on even a moment's examination, will readily discover. They will do more and better work than any other Machine ever offered to the public, making the most beautiful lock-stitch, alike on both sides. Send for an off-hand specimen of sewing upon any material you wish, and you will then see how it is done.
